EVO R+ FP

EVO R+ FP

The **EVO R+ FP** is a highly optimized mobile C-Arm system for surgical fluoroscopy. With advanced cooling technology, and a state-of-the-art flat panel detector, the EVO R+ FP provides the versatility and image quality required to perform a wide range of long procedures in a busy operating room.

Multiple digital configurations for a perfect fit

The Evo R+ FP is available in several different configurations. Available with 2 different sized flat panel detectors (23*23 or 30*30 cm), and a 5kW or 20 kW generator power, the EVO R+ FP covers many different types of surgical procedures including orthopedics, pediatrics, gastroenterology, vascular including DSA, and other general surgery procedures.

Easy to use !

The operator has access 15.6" touch-screen panel to set all the required parameters, to manage the images and to adjust the acquisition parameter functions in real-time.
